Race Time History: Most Recent Time _____ **Year** _____ **Est. Time** _____

Historical Time: Previous Golden Leaf times will be used for wave placement unless the runner has not participated in this event before. Historical times will be looked at for all competitors.

Estimating Your Time: Typically you can add 30 minutes to road half marathon with no elevation gain (more if you are unaccustomed to an elevation of 8000 feet). Another way to estimate your time is to compare yourself to how racers finished in 2018. Out of 768 finishers in 2018, the following results were achieved: 1st place – 1hr 26min; 50th place – 1:56; 100th place – 2:05; 192nd place (top 1/4) – 2:17; 384th place (middle of the pack) – 2:34; 576th Place (top 3/4) – 2:52. Please try to be realistic with your time as this will allow the waves to work properly and reduce congestion on the course.

If a time is not entered above, participant will be placed in the final wave.
